Address:

Universitatea din Bucureşti, Facultatea de Geologie şi Geofizică,
Bd. N.Bălcescu nr.1, 010041 Bucureşti
University of Arizona, Department of Geosciences,
Tucson, Arizona 85721-0077
Phone: (520) 665-1254; **E-mail:** ducea@arizona.edu

Education

California Institute of Technology, Ph.D. (Geology), 1998

Advisor: Prof. Jason Saleeby

California Institute of Technology, M.S. (Geology), 1995

Advisors: Prof. Jason Saleeby and Prof. Peter Wyllie

University of Bucharest, Romania, Diploma of Geology Engineer, 1991

Advisor: Prof. Marin Seclaman and Prof. Emil Constantinescu

Professional Experience

Professor, University of Bucharest, Romania (08/21- present)

Professor, Department of Geosciences, University of Arizona (09/09-present)

Associate Professor, Department of Geosciences, University of Arizona (04/04-09/09)

Assistant Professor, Department of Geosciences, University of Arizona (1/01-04/04)

Postdoctoral Scholar, Caltech and Florida International University (12/98-12/00)

Graduate Student, California Institute of Technology (4/94-12/98)

Graduate Student, Department of Geology, Duke University (6/92-3/94)

Research

Summary: I am a tectonic petrologist, focusing on a variety of problems from subduction related (magmatism, subduction erosion, delamination) to extension and collision of the continents. I investigate mineral evolution, cyclicity of orogens, sutures, transform faults, and metamorphism in collisional belts among others. Regions of interest are the western North American Cordillera, the central Andes, the Pamirs, the Carpathians and Balkan Mountains, mainland Asia from Mongolia to Tibet, and others. At Univ. Arizona I oversee a trace elemental geochemical + radiogenic isotopic (TIMS) facility. With students and collaborators, I wrote about 195 peer reviewed papers including journal papers and chapters in books, a few of which are in press. I collaborate with over 800 co-authors from 27 countries. My H-index is 51 in WOS, 54 in Scopus and 62-Google Scholar. I have around 12350 citations in Google Scholar and around 8700 in WOS in about 23 years post PhD. My papers range from regional geology to technique development, global data analysis and exploring new concepts in tectonic research. I collaborate with geophysicists, climate change scientists, archeologists, paleontologists, as the publication record shows. I purposely have maintained a wide range of interests in Earth Sciences from my early career on in an effort to have a broad handle on geologic problems. This should be evident in my publication record ranging from regional geology and recognition of fault systems to development

Curriculum Vitae - Mihai N. Ducea

of better isotopic techniques, from crustal evolution studies based on zircon petrochronology to carbonate subduction, from arc tempos to delamination of arc roots, etc.

My research so far was centered on ten major topics in petrology, geochemistry and field geology; I think I made important contributions to these – see papers listed below:

1. Crust mantle exchange at subduction systems. I study exposed arc lower crustal sections at various locations in order to quantify the exchange between crust and mantle via magmatism and foundering. My PhD thesis has the first to document igneous cumulate and residues as eclogite facies rocks under arcs (known today as *arclogites*) and the hypothesis of arc root foundering under thick continental arcs.
2. Fluxes and tempos of arc magmatism. We use granitoid geochronology and field constraints to quantify regional and global fluxes of magmas in arcs and find causes for the non-steady state behavior of arcs.
3. Regional geology. I contribute to regional geology studies (most recently in the Carpathians) via geologic mapping and geochronology and thermochronology with a particular focus on basement terrains.
4. Sm-Nd, Rb-Sr and other geochronology applied to igneous and metamorphic rocks. I oversee a TIMS and ICP-MS laboratory where we push the envelope of various geochronologic techniques, with a focus on metamorphic geochronology.
5. Ultra shallow subduction. We study the field evidence for underplating mechanisms and their consequences for convergent margin evolution. The focus so far was on Western North America and Mexico.
6. Crustal and mantle xenoliths. I have a long-term interest in using xenoliths as tectonic tracers of lithospheric composition and evolution.
7. Mineral evolution. We study the linkages between tectonic processes in a Wilson cycle and the distribution of mineral species on continental regions.
8. Geophysics and petrology of deep arcs. I am invested in collaboration with geophysics groups (seismologists and other geophysicists) to decipher the composition and extent of magma bodies under subduction systems.
9. Basalt petrology. We use the geochemistry of basalts from various regions to test for magnitude of extension, provide tests of delamination and other tectonic processes in various continental regions.
10. Geochemistry and crustal thickness over time. We use intermediate rock trace elemental geochemistry and that of derivative trace minerals (zircon, apatite) to quantify crustal thickness evolution over time in orogenic regions.

Teaching/advising

Summary: My teaching duties and interests span the undergraduate and graduate curriculum and also include shorter topical seminars for the most advanced scholar. Most of my teaching activities are performed at University of Arizona and University of Bucharest, although I did teach shorter modules and more advanced course at other Universities (China University of Geosciences, University of Concepcion and UBB Cluj). I have a series of short courses on geochronology, geochemistry and other novel developments of use to the oil and gas industries. They have been presented in short modules at Chevron, OMV, Ecopetrol and other large corporations. Most

Curriculum Vitae - Mihai N. Ducea

recurrent class I teach for U Arizona is Undergraduate Petrology (Igneous and Metamorphic). I am in the final stages of completing a Petrology textbook (Ducea and Sen, Springer, 2022), which used to be Sen (2014) in its first edition. It is a new way of looking at petrology, with limited phase diagrams and a more comprehensive geochemical approach and a tectonic framework for understanding melting and metamorphism.

Courses taught:

- Petrology (undergraduate)
- Field Camp (undergraduate)
- Physical Geology (undergraduate)
- Structural Geology (undergraduate)
- Geochronology/thermochronology (undergrad/grad)
- Tectonic Petrology (graduate course)
- Regional Tectonics (graduate course)
- Chemical evolution of the Earth (new graduate course for 2021)
- Hot Spots (graduate course or seminar)
- Alpine and Carpathian geology (grad seminar)

Outstanding students and postdocs: Undergraduates: Thereza Kayzar, Guleed Ali, Jordan Kremaric, Derek Hoffman. Graduate students: Steven Kidder, Christian Manthei, David Pearson, Mary Robinson Cecil, Jay Chapman, Kendra Murray, Lucia Profeta, Fangyang Hu, Emily Bowman, Anca Barla. Postdocs: Alexander Robinson, Alan Chapman, Paul Wetmore, Antoine Triantafyllou, Constantin Balica, Lyung Zhang, Fuhao Xiong, Yunchuan Zeng.

Honors & Awards

Koons Graduate Fellowship, 1998
GSA fellow, 2016
Dida Scholar, China University of Geosciences, Wuhan, 2016-2019
Fulbright Scholar, 2017-2018
Member of the Romanian Academy of Sciences since 2021

Scholarly Presentations (past 5 years)

Oregon State University, Istanbul Technical University, Stanford University, China University of Geosciences Wuhan, China University of Geosciences Beijing, University of Oslo, Babes Bolyai

Curriculum Vitae - Mihai N. Ducea

University of Cluj Napoca, University of Bucharest, University of Liege, University of Brussels,
University of Leicester

Keynote talk GSA Phoenix 2019

Invited talk at the Annual Goldschmidt Conference, August, 2015, Prague

Keynote Speaker GSA Indianapolis 2018

Service/Outreach

Summary: I have served on numerous departmental committees at Arizona, as well as for the GSA and AGU. I serve on departmental committees at U Arizona and at U Bucharest. I am providing countless reviews for journals and funding agencies throughout the world (USA, China, Hong Kong, Poland, Ukraine, Chile, Argentina, Romania – these only for the past year, 2020). Major community service efforts are currently focused on giving talk on the nature and significance of Earth Sciences to high-schools in Arizona and Romania.

Highlights (top 10) of my service/synergistic activities (past 5 years):

Serving on numerous departmental committees (Performance Evaluation, Graduate Policy, Various Hiring Committees, Promotion and Tenure, Field Camp);

Working with National Association of Geosciences Teachers (field trips, mini-courses);

Contributions to development of NSF Earthscope's GEOFRAME initiative;

Organizing and chairing several GSA, AGU and Goldschmidt topical sessions to highlight new avenues in Petrology and Tectonics research;

Serving on publication committee at GSA

Co-Edited a GSA Memoir volume: DeCelles, P.G., Ducea, M.N., Carrapa B., and Kapp, P. (editors), "Geodynamics of a Cordilleran Orogenic System: The Central Andes of Argentina and Northern Chile", Geological Society of America Memoir, 2015;

Co-Edited volume on "Tethysides in Central and Eastern Europe", with Celal Sengor, Hans Thybo and Ogus Goguz, in press, 2021, Tectonics;

Director (Pro-bono) of the Earth Science Division of the Research Institute of the University of Bucharest; iCUB, 2020-2021; help them set things up

National Science Foundation Panelist (GEOPRISMS, Petrology, Tectonics);

Finalist of NSF Idea Machine competition for developing new programs at NSF (With collaborators Barbara Carrapa and Mihai Surdeanu, U Arizona), with an Artificial Intelligence in Geoscience project, 2019.

Curriculum Vitae - Mihai N. Ducea

Current Editorial Services

Tectonics, Associate Editor (2018 -present);
International Geology Review, Associate Editor (2016 – present),
GSA Bulletin, Chief Editor (2022-2025)

Numbers of Manuscripts and Proposals Reviewed

465 manuscripts reviewed between 2000-2021 (e.g. Nature, Tectonics, J Petrology, Geology, JGR, GSA Bull, Contributions to Mineralogy and Petrology, etc.);
235 proposals reviewed between 2000-2021 (for NSF, PRF, and other national and international organizations).

Funding

In my 21 years as a faculty member at University Arizona and more recently at University of Bucharest, I have successfully secured research grants and industry contracts as a principal investigator and co-principal investigator. A complete list of grants, contracts and service contracts (laboratory work for third party contractors) is available on request. I do not keep a detailed financial evidence of these, but the University of Arizona does. Below, I provide a list of some of the most important grants in my career development.

US Federal and Private competitive funding:

- Collaborative Research: TransANdean Great Orogeny (TANGO), NSF multiple sources, 08/20-07/2024
- Rare earth elements tracing crustal evolution through time: a detrital zircon study - NSF-Tectonics; 07/01/17-6/30/21.
- Constraints on Plateau Architecture and Assembly From Deep Crustal Xenoliths, Northern Altiplano (Southern Peru), Program: NSF Petrology-Geochemistry, 07/01/15-6/30/17.
- Crustal Overturn in Continental Margin Arcs During Magmatic Surges NSF Tectonics, 06/01/2011-5/31/2014
- Collaborative Research: The suturing process: Insight from the India-Asia collision zone NSF Continental Dynamics, University of Arizona, 04/01/11 – 03/30/15
- In Pursuit of missing Andean Lithosphere: constraining Late Cenozoic crust-mantle process in the Puna Plateau, central Andes NSF Tectonics, 9/1/09 – 8/31/12
- Collaborative Research: CAUGHT: Central Andean Uplift and the Geodynamics of High ‘Topography NSF Continental Dynamics, 6/1/09 – 5/31/13

Curriculum Vitae - Mihai N. Ducea

- Collaborative Research: Lithospheric removal: The Sierra Nevada as the prototype of a fundamental process in mountain building NSF Continental Dynamics, 6/1/06 –5/31/10
- Facility Support: Completing the Western North American Volcanic and Intrusive Rock Database (NAVDAT) NSF Instrumentation-Facilities, Facilities support, 9/1/06- 8/31/08
- Collaborative Research: BATHOLITHS: Generation and evolution of crust in continental magmatic arcs National Science Foundation (Continental Dynamics Program), 1/04- 1/09
- Igniting Continental Arcs; A Petrologic Study Of Peridotites And Mafic Rocks From The Coast Ridge Belt, Santa Lucia Mountains (California), National Science Foundation (Petrology-Geochemistry Program), 01/2003-12/2005
- Acquisition of micromill and the development of a micro-sampling facility National Science Foundation (Instrumentation and Facilities Program), 01/2002-12/ 2002
- Testing the degree of correspondence between surface tectonic features and upper mantle structure and composition by study of volcanic-hosted xenoliths in the southwestern Cordillera National Science Foundation (Tectonics Program), 01/ 2001-12/2002
- Sm-Nd thermochronology of garnets in metamorphic rocks: A new method and tectonic application National Science Foundation (Petrology Program), 01/2001-12/2002
- Collaborative Research: Laboratory and field studies linking electrical anisotropy and deformation in the mantle National Science Foundation (Geophysics Program), 9/2000-8/2001
- A thermobarometric study of deep-crustal rocks from southwest Mexico University of Arizona, 12/ 2000-12/ 2001
- K-Ca Geochronology; New Analytical Developments Using Multicollector ICP-MS And Geologic Applications, American Chemical Society, Petroleum Research Fund, 9/2006- 8/2009
- In-Situ U-Pb Age Determinations Using Multiple-Collector ICP Mass Spectrometry: Further Technique Developments And A Tectonic Application, American Chemical Society, Petroleum Research Fund, 9/2002-8/2004
- Evolution of the Andes, EXXON-MOBIL Center for Orogenic System Analyses (COSA) grant, Phase 1 9/2007–8/2010
- Evolution of the Andes, EXXON-MOBIL, Center for Orogenic System Analyses (COSA) grant Phase 2, 8/2010-7/2013
- Isotopic techniques constrain the evolution of oil genesis in carbonate reservoirs, Chevron Energy Technology (2010-2015)

Curriculum Vitae - Mihai N. Ducea

- Food forensics, Mars Chocolate Company (2015-2018)
